Complete email security for the cloud generation

Symantec Email Security.cloud is a complete email security solution that safeguards cloud email, such as Microsoft Office 365 and Google G Suite, as well as on-premises email. It blocks new and sophisticated email threats such as ransomware, spear phishing, and business email compromise with a multilayered defense and insights from the world's largest civilian global intelligence network. And it does all this with the industry's highest effectiveness and accuracy.

KEY FEATURES --

Comprehensive defense

Protect your business from malware, spam, phishing, credential theft, ransomware, and emerging threats with multiple layers of protection such as sender authentication, spam filters, link protection, email threat isolation, impersonation control, behavior analysis, advanced machine learning, and sandboxing.

Rapid response and remediation

With Integrated Cyber Defense, contain attacks and orchestrate a response across emails, endpoints, and web gateways by blacklisting threats, quarantining and remediating attacks, and correlating security analytics.

Security awareness

Prepare users to avert attacks and prioritize email protection for vulnerable users. Evaluate employee readiness by simulating real-world email attacks that imitate the latest email threats. Benchmark and improve user readiness over time with detailed reporting and repeat assessments. Teach users to recognize email attacks through training notifications that raise security awareness.

Prevent data leakage and protect privacy

Protect sensitive data and help address legal and compliance requirements through Symantec Data Loss Prevention. Discover, monitor, and protect sensitive data wherever they're used—in email, on endpoints, in your network, in storage, and even in cloud apps. In addition, safeguard the privacy of confidential emails with policy-driven enforcement that includes the ability to expire and recall messages as well as automatic encryption of sensitive emails with a secure PDF or web pickup portal.

KEY BENEFITS --

Effective and accurate

Stop new and sophisticated threats with the most effective and accurate email security.
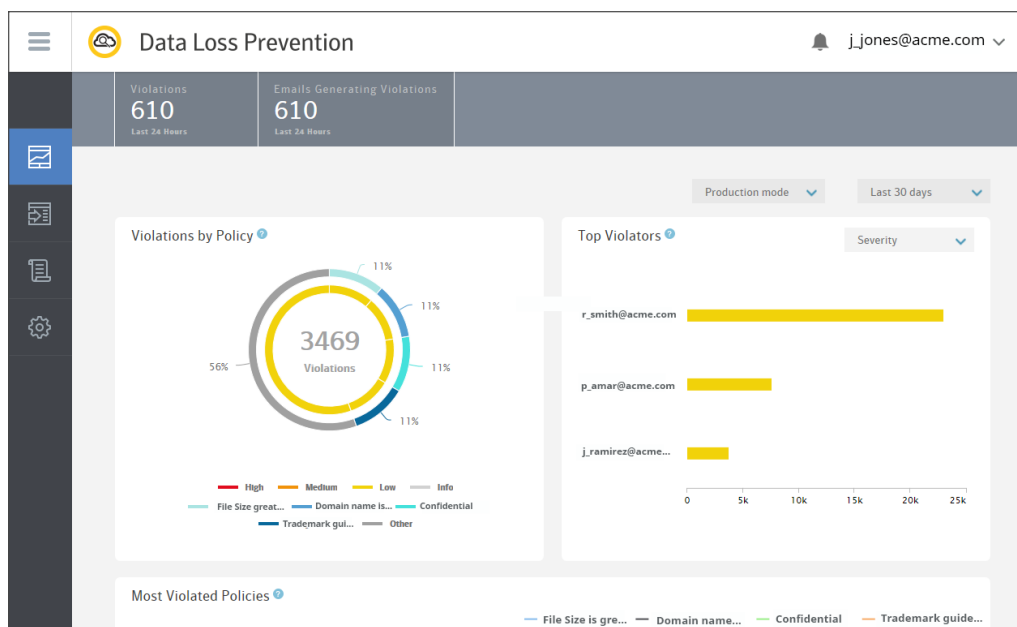

Increased productivity

Machine downtimes due to email attacks are drastically decreased, easing IT workloads and allowing employees to be more productive.

Peace of mind

Rest easy knowing your critical email communications are secure and protected.

Strong security network

Symantec Email Security.Cloud is part of Symantec Global Threat Intelligence, which is powered by telemetry from more than 175 million endpoints, 80 million web proxy users, and 57 million attack sensors in 157 countries. As part of the world's largest civilian network, Symantec helps ensure better security outcomes.
